

Q(2) print numbers from 1 to n in increasing order.

way ①

```
f(i, n) { // i = 1
    if (i > n) {
        return;
    }
    print(i);
    f(i+1, n);
}
```

case ② Approach
post-operation

Q3 factorial of number :

```
fact(n) {
    if (n == 0) {
        return 1;
    }
    return n * fact(n-1);
}
```

Q4 Sum of first n natural numbers.

```
func(n) {
    if (n == 0) {
        return 0;
    }
    return n + func(n-1);
}
```

Q5 find nth fibonacci number.

```
fib(n) {
    if (n == 0 || n == 1) { return n; }
    return fib(n-1) + fib(n-2);
}
```
