

Binary tree

depth 1
depth 2
height = 3

height = 4

class Node {

int data;

Node left, right;

Node (int data) {

this.data = data;

this.left = this.right = null;

}

degree of each node = 2 except the leaf node
perfect Binary tree

l = 3
d = 3

total no of nodes
= $2^3 - 1$
= $2^l - 1$

degree = no of sub nodes

Complete Binary tree

heap

[right subtree will not be there before left subtree/node and fills the node left to right] ← for a complete level
